

CHARTER BUSINESS[®]

MANAGED SECURITY

HELP PROTECT YOUR DATA AND NETWORK FROM VIRUSES, WORMS, INTRUSIONS, AND OTHER THREATS

» Simple

We handle all the configuration, implementation, and active management of your security service, and we automatically keep it updated against the latest threats.

» Flexible

Works anywhere there is a broadband connection and can be customized to fit your security needs.

» Reliable

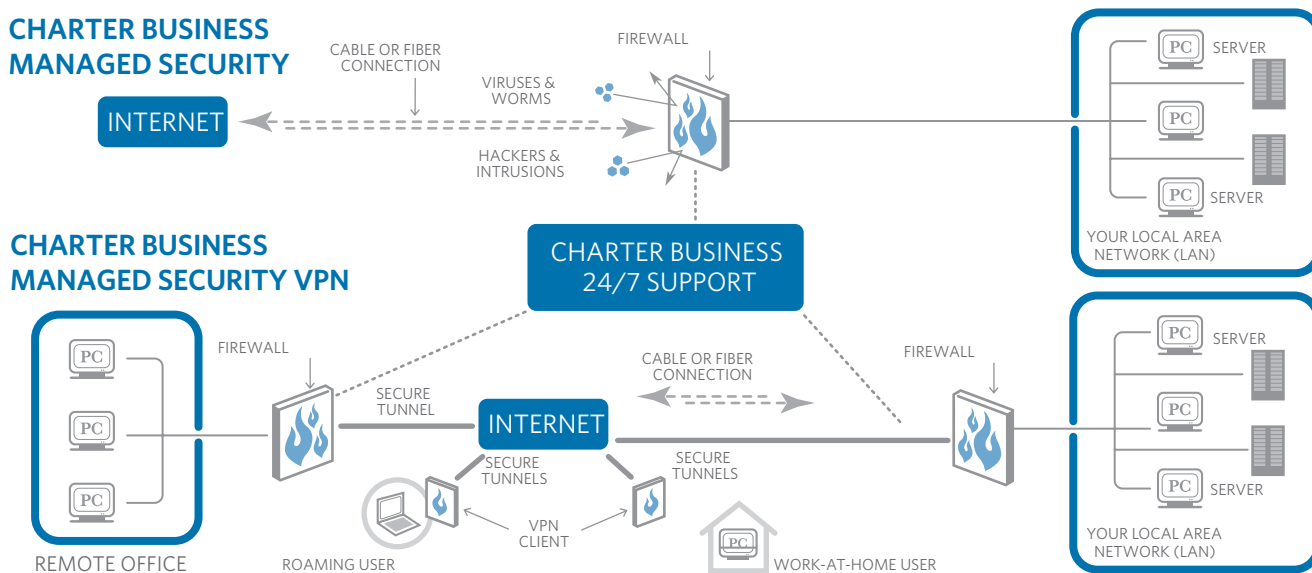

Includes 24/7 monitoring and security-alarm response backed by local Charter Business[®] technicians.

| WHAT IT IS

Charter Business Managed Security provides network and data protection for businesses of any size. The system can also reduce threats and increase efficiency by allowing you to control what content is accessible to employees online. And with the addition of Charter Business Managed Security VPN, your protection can be extended to multiple offices and off-site workers.

| HOW IT WORKS

Charter Business Managed Security utilizes FortiNet FortiGate[™] firewalls, which have won numerous industry awards and are ICSA certified for firewall, intrusion detection, antivirus, and IPSec VPN.

CHARTER BUSINESS® MANAGED SECURITY

HELP PROTECT YOUR DATA AND NETWORK FROM VIRUSES, WORMS, INTRUSIONS, AND OTHER THREATS.

WHAT YOU GET

Feature	Benefit	Managed Security	Managed Security VPN
Firewall	ICSA-certified firewall conducts deep inspection of your network traffic to provide protection against unauthorized access.	✓	✓
Antivirus	Limits vulnerability by detecting viruses and worms before they enter your network by scanning incoming and outgoing email attachments, as well as FTP and HTTP traffic.	✓	✓
Intrusion Detection	Enhances protection of your network against attacks that evade conventional antivirus products.	✓	✓
Content Filtering	Increases employee productivity and makes efficient use of your available network resources by filtering users' internet access by disallowing sites in certain categories, allowing up to 32 different category profiles, each defined by you.	✓	✓
Anti-Spam	Increases the efficiency and security of your email network by allowing you to scan all incoming and outgoing email messages.	✓	✓
Traffic Shaping and Management	Averts unwanted applications from consuming your network resources by blocking or rate-limiting bandwidth-consuming applications.	✓	✓
Proactive Management	Proactively monitors your network to identify and respond to threats.	✓	✓
On-Demand Reporting	Produces reports for your review that show real-time and historical information on your network's security activity.	✓	✓
Business VPN	Allows multiple sites to work as if they were on the same local network by connecting two or more remote sites. Each remote site requires a separate Charter Business® Security VPN account.		✓
Remote Worker VPN	Users can access your network anytime, anywhere with a software client, whether on or off the Charter Business network, allowing remote workers to securely access your company's network resources.		✓
Additional Remote Worker Clients	Provides access for additional mobile or remote users.		✓ <i>(Additional fee applies)</i>

Call today and let Charter Business focus on your security—so you can stay focused on your business.
